## SKILLS

- **Financial Modeling & Forecasting:** Scenario planning, cash flow modeling, budget analysis using Excel.
- **ERP & EPM Systems:** Proficient in SAP FICO, Oracle ERP Systems, Financial Planning, and Smart View.
- **Data Analytics & Automation:** Expertise in Power BI, SQL, DAX for dashboards, KPIs, and reporting.
- **General Ledger & Reporting:** Expertise in month-end close, journal entries, trial balance, GAAP reporting.
- **Cost & Variance Analysis:** Conduct standard costing, margin analysis, variance, and financial reviews.

## WORK EXPERIENCE

### Co-op Student - Financial Services & Testing

October 2023 – Present

*TransforML Platforms Inc.*

*Remote, Ontario*

- Executed financial analysis & system integration testing for platform releases, identifying 100+ software bugs, enabling a 78% drop in deployment issues across five agile sprints with accelerated release timelines and coverage.
- Partnered with the engineering team to reproduce UI anomalies across browser versions, reliability, and reducing customer reported errors by 50% over three product versions while increasing mobile functionality consistency.
- Designed regression test cases aligned to user stories and technical specs, achieving 65% rise in scenario coverage through automation readiness and enabling seamless UAT system support across multi-platform environments.
- Defined DevOps based pipelines to validate feature performance and escalate critical issues, reducing system resolution times by 34% and increasing average sprint QA throughput by 40% through active collaboration.
- Conducted exploratory testing to validate edge cases, reporting 20+ latent bugs, increasing product efficiency by 30% across devices, systems and platforms by applying defect prioritization matrices and test log analysis.

### Assistant Manager - Financial Systems

June 2021 – September 2023

*Genpact*

*India*

- Integrated UAT and Power BI tools for resolving 30+ queries daily, which improved turnaround time by 4 hours, issue resolution, and enhanced financial data reporting effectiveness by 38% for global finance stakeholders.
- Integrated SAP and Oracle datasets using reconciliation frameworks, increasing ledger data accuracy by 95% and saving 80 hours monthly in manual checks while improving financial transparency and audit efficiency metrics.
- Monitored general ledger workflows during month-end close cycles, validating 10,000+ entries quarterly to support compliance, reducing journal entry variances by 60% and enabling investor-level reporting structure.
- Directed FP&A initiatives across two business units by mentoring two analysts, expediting deliverables by 18%, enhancing accountability using structured KPIs and real-time dashboards aligned to operating expense forecasts.
- Collaborated with operations and IT to enhance reporting logic in Hyperion, cutting variance analysis completion times by 40% rate through formula optimization metrics and cross-functional performance review alignment.

### Senior Account Executive - Project Accounting

November 2014 – June 2021

*Fluor Daniel India Private Limited*

*India*

- Forecasted monthly accruals and recorded cost-to-complete entries across 10+ EPC projects, aligning revenue recognition schedules and reducing audit discrepancies by 45% through precise data governance practices.
- Structured SAP WBS hierarchies and analyzed budget variance reports to reduce cost leakage rate by 30%, improving project control metrics and streamlining team financial planning cycles across engineering procurement.
- Administered invoice cycles and cash flow schedules for 20+ active projects, cutting receivable clearance durations by 12 days through disciplined client follow-ups and realignment of retention milestones with contract clauses.
- Automated internal budget tracking using Excel macros and pivot tables, enhancing report accuracy by 50% & increasing project visibility for leadership teams during monthly PMO presentations and strategic reviews.
- Liaised with treasury and tax compliance for withholding tax validations, raising documentation precision by 90% and ensuring audit readiness for statutory inspections and quarterly regulatory filings across three departments.
